

A modern conference room with large windows and a blue tint. The room features a long table, several chairs, and a laptop on the table. The text "GROUP BY" is centered in the image.

**GROUP BY**

## GROUP BY

When working in SQL, results can be grouped according to a specific field or fields

# GROUP BY

- GROUP BY

When working in SQL, results can be grouped according to a specific field or fields

# GROUP BY

## ● GROUP BY

When working in SQL, results can be grouped according to a specific field or fields

- GROUP BY must be placed immediately after the WHERE conditions, if any, and just before the ORDER BY clause

# GROUP BY

## ● GROUP BY

When working in SQL, results can be grouped according to a specific field or fields

- GROUP BY must be placed immediately after the WHERE conditions, if any, and just before the ORDER BY clause
- GROUP BY is one of the most powerful and useful tools in SQL

# GROUP BY

## GROUP BY

SQL

```
SELECT column_name(s)
FROM table_name
WHERE conditions
GROUP BY column_name(s)
ORDER BY column_name(s);
```

# GROUP BY

## GROUP BY

*in most cases, when you need an aggregate function, you must add a GROUP BY clause in your query, too*

*Always include the field you have grouped your results by in the **SELECT** statement!*
