

A modern conference room with large windows and a blue tint. The room features a long table, several chairs, and a laptop on the table. The windows offer a view of a cityscape. The word "AND" is centered in the image.

AND

AND

- = equal operator

## AND

- = equal operator

in SQL, there are many other *Linking keywords and symbols*, called operators, that you can use with the WHERE clause

# AND

- = equal operator

in SQL, there are many other *Linking keywords and symbols*, called operators, that you can use with the WHERE clause

- AND
- OR
- IN      - NOT IN
- LIKE    - NOT LIKE
- BETWEEN... AND...

# AND

## ● = equal operator

in SQL, there are many other *Linking keywords and symbols*, called operators, that you can use with the WHERE clause

- AND
- OR
- IN      - NOT IN
- LIKE    - NOT LIKE
- BETWEEN... AND...
- EXISTS    - NOT EXISTS
- IS NULL   - IS NOT NULL
- comparison operators
- etc.

AND

AND

# AND

- AND

allows you to logically combine two statements in the condition code block

# AND

## AND

allows you to logically combine two statements in the condition code block

SQL

```
SELECT column_1, column_2,... column_n  
FROM table_name  
WHERE condition_1 AND condition_2;
```

# AND

## AND

allows you to logically combine two statements in the condition code block

SQL

```
SELECT column_1, column_2,... column_n  
FROM table_name  
WHERE condition_1 AND condition_2;
```

- allows us to *narrow* the output we would like to extract from our data
